

Superior Paper Handling Solutions, Inc.

XM Batching Tray

Ideal for inline, near line, and offline batch counting

Simple, bolt on attachment for XM Series Friction Feeders

Easy to adjust for product changeovers

Minimum Product Size
4" x 4" & 7" x 4"

Maximum Product Size
12" x 12"

Accumulation Thickness
Up to 3"

The NEW XM Batching Tray was designed to help customers accumulate batch counted products in a neat stack for removal. *No more hand counting! No more scale weighing! No more spearing! No more "messy" stacks!*

When used with an XM Series Batch Count Feeder, the combination provides a "roll-around" batch counter for inline, offline, and near line use throughout your production and packaging areas. **Perfect for roll-in, roll-out use with automatic and semi-automatic L-bar sealers, strappers, banders, stitchers, and more!**

Simple adjustments make the Batching Tray easy to use and product changeovers are quick thus maximizing up-time.

The Standard Batching Tray (100899) is ideal for most products. For products that require a little more support due to lack of body, we offer an Extended model (100898).

Batch-counting solution with
XM-Series Feeders

Flag triggers the sensor each time a batch is manually removed to automatically begin the next batch

Shock absorber creates a smooth cycle each time the batch is manually removed
