

We Have Your Solution

Let us show you how easy - and profitable - automation can be.

Thiele Technologies, which offers the Streamfeeder product line, combines the capabilities of Streamfeeder with the strengths of a large, industry-leading company, Thiele Technologies. This combination enhances our ability to create superior value for you with broader product offerings and more resources.

While working diligently to maintain the product quality and superior service you have come to expect, our priority is to offer you the best people and products to help you be successful.

The Streamfeeder product line provides automation solutions to the commercial printing, contract packaging, and mailing & fulfillment industries. Applications include **Mailing** (inserting, inkjetting, labeling, tabbing, folding, reinforcing), **Batch Counting** (greeting cards, trading cards, envelopes), **Print Packaging** (retail packaging, stationery, scrapbooking), **Fulfillment** (kits, product manuals, presentation folders, catalogs), **Polybag Wrapping** (mailing publications, magazines, catalogs), **Complete Systems** (collating, tip-on/affixing, package inserting, bar code reading, and much more).

Whether it's a single feeder or a complete integrated system, our broad experience and knowledge qualifies us to solve the most challenging production automation problems for the best value.

Introducing the Next Generation Feeders in Our Value Series

Both the V-1000 and the new V-2000 feature quick and tool-less setup, quick make-ready, and easy maintenance. Each are capable of feeding a wide variety of materials at high speed with exceptional alignment qualities. Applications include:

- Ink Jet Bases
- Mail Processing
- Labeling Bases
- Tabber Bases
- Folding Machines
- Reinforcing Machines
- UV Coaters

Features:

Movable Feed Belts can be positioned for optimum product feeding, allowing for consistent straight feeding of a wide variety of products.

Movable Product Separators help separate product either on or off the belts.

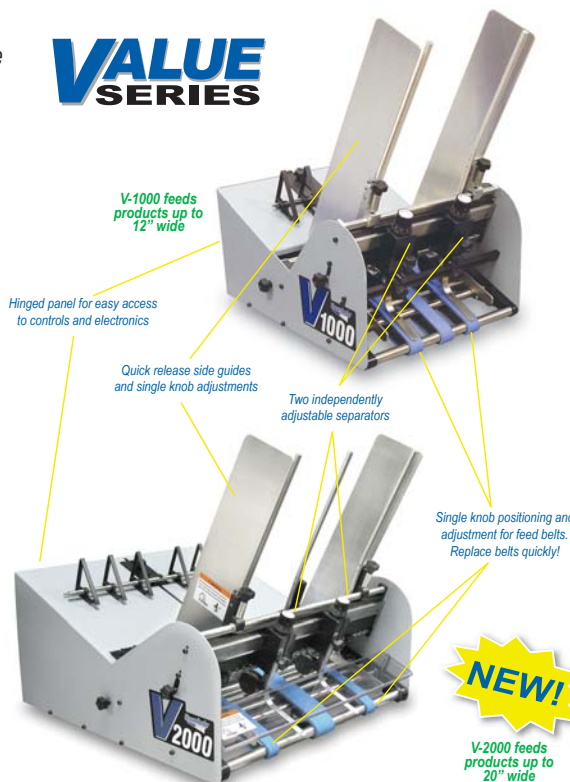

Quick Release Side Guides enable you to easily pass the side guides over the belts.

Single Knob Side Guide Adjustment allows for individual side guide position adjustment.

Quick Change Carriage means faster belt replacement to reduce downtime.

Quick Access Service Panel provides easy access to controls and electronics.

Universal Electronic Interface Kit provides the start/stop function to integrate with most systems and most mailing bases.

Solutions For the Printing Industry...

Mail Processing

Our mailing solutions range from adding feeders for handling difficult products on existing gripper arm inserters to high speed units designed to maximize your throughput on inkjet and tabbing applications. Our standard feeders are designed with enough flexibility that they can be quickly integrated to whatever brand of equipment is on your shop floor.

Batch Counting

We have solutions for your batch counting operations. Our systems accurately count and accumulate printed materials at high-speed. Systems can be designed to integrate with shrink wrapping, bundling, cartoning, banding, and more.

Fulfillment

Automate the collation of all the materials for placement into presentation folders, shrink wrap, poly bags, envelopes, or cartons.

Polybagging

Our QuickWrap Wrapping System is perfect for short-run jobs. Produces quality center-sealed bags up to 50 packages per minute. Use it for packaging:

- Magazines
- Mailing publications
- Brochures
- Catalogs
- Books
- Product literature
- Annual reports

Solutions For a Variety of Industries...

Systems

Systems designed to automate manual labor processes for reducing manual labor, eliminating bottlenecks and raising productivity to help you increase profits. We provide design, engineering, integration, and installation for packaging, mailing, and print finishing applications. Innovative technologies such as communications and controls software make our systems the ideal solution for a wide variety of applications.

Denester Closing Line

We design and build customized systems for placing clamshell trays onto a flighted conveyor and then automatically closes the lids. Ideal for bakery packaging applications.

Specialty Applications

From barcode reading to integrating a vision system for variable batch counting, we have your solution. We have developed solutions for automating products as diverse as multifolded pharmaceutical inserts to bound books.

Small Product Feeding

Package Inserting

U-Card Forming

Barcode Reading

Streamfeeder Feeding/Placing Technologies Continue To Be Unsurpassed

Feeders/Dispensers

A new level of feeding performance. The Servo Series has been designed with high-speed servo motor technology to handle the most challenging products. The heavy-duty construction and simple tool-less, single-knob adjustments give you the flexibility of using it in stand-alone applications, as well as integrating into other systems.

The premiere Pro Series incorporates an intelligent system controller into its stainless steel enclosure, giving you the flexibility of stand-alone applications or integrated into other systems. Capable of handling a wide variety of products.

Streamfeeder quality at a low-cost entry level. The Reliant Series offers dependable one-shot and batch count feeding. Reliably separates, singulates, and delivers a wide variety of products. Easy to use and changeovers are quick and tool-less.

The Value Series combines quality feeding performance at an affordable price level. Reliably separates, singulates, and delivers a wide variety of products. Offers many features. Easy to use and changeovers are quick and tool-less.

Placers

Rotary Placer

Designed to be highly versatile with impressive accuracy and high-speed for literature or shallow-tray feeding, multi-task assembly and denesting applications. Ideal in situations where you must not mar the product. Features innovative design and heavy-duty construction. Easily integrates with a variety of equipment.

Reciprocating Placer

Designed to accurately place products onto intermittent or continuous motion conveyors. Ideal in situations where you must not mar the product. Features innovative design and heavy-duty construction. The option of vertical or horizontal placement orientation makes this machine extremely versatile and is easily integrated with a variety of host equipment.

"Mini" Reciprocating Placer

Like its larger cousin - the Reciprocating Placer - the "Mini" is designed to accurately place products onto intermittent or continuous motion conveyors. Ideal in situations where you must not mar the product. Use it in areas where space is limited. Easily adapts to a variety of conveyors and production machinery.

Reciprocating Tray Denester

Designed to accurately place products onto intermittent or continuous motion conveyors. Ideal in situations where you must not mar the product. Features innovative design and heavy-duty construction. This machine is extremely versatile and is easily integrated with a variety of equipment.

Thiele Technologies, Inc., a Barry-Wehmler company, provides advanced high-speed packaging automation solutions worldwide for a variety of applications and products such as fresh and frozen food, dairy, bakery, pet food, beverage, horticultural, paper goods, pharmaceutical, medical devices, cosmetics, paint, and petro chemicals. With more than 70 years of service, Thiele is a leader in the design, manufacture, and integration of placing, bagging, cartoning, case packing, and palletizing equipment.

In addition to providing the most advanced technology available, Thiele's comprehensive service capabilities offer the support necessary to maximize your investment. Parts, equipment upgrades, technical assistance, and training are available to ensure proper machine operation. Additionally, a 24-hour technical service hotline provides prompt assistance for emergencies.

Barry-Wehmler Companies, Inc. is a world leading supplier of packaging, corrugating and paper converting technology, as well as consulting services, across a broad spectrum of industries. The company's balanced and diversified approach to the market is made possible through 11 interactive divisions. In fiscal year 2006, a combination of organic and acquisition growth propelled the company's annual revenues to approximately \$800 million for the first time in its 120-year history, with more than \$200 million of that in global markets.

We are confident you'll find our Streamfeeder product line an even more powerful solution for your application needs than ever before.
